

XÓCHITL GLZ LEOS

TSU STUDENT IN INFORMATION TECHNOLOGY, MULTIPLATFORM SOFTWARE DEVELOPMENT AREA.

ABOUT ME

A significant experience that consolidated my interest in the IT area was doing an **internship at the Municipal Public Security Secretariat of Aguascalientes, Mexico (C4) during high school**. I acquired knowledge from computer equipment **maintenance to network configuration** on servers and **installation of security equipment**. During my studies at the Universidad Tecnológica Metropolitana, I participated in several **competitions**, including the **Smart Security Hackathon (INCyTEA 2023)**, and **we won third place in the agribusiness category at the Venado TECH 3.0 Hackathon 2023** with the **Smart Biodigester project**, a biodigester with parameter measurement. Other projects that we have developed and presented as a team include a lock for access control in childcare centers and an automated system for the production of fodder for cattle feed based on nopal cactus.

EDUCATION

2022 - CURRENTLY

University Technician in Information Technology, Multiplatform Software Development Area [Selected for Dual Model].
